IFPN-PRN7

Dot Matrix Printer

The PRN7 is an optional dot matrix printer for use with the IFP-NET-3 system. The PRN7 can be attached to an IFP-NET-3 workstation to print system events, text of linked files, and history logs.

APPLICATIONS

Printed transaction records reduce the man-hours required to install and maintain a system. A printed record of all system events (alarms, troubles, etc.) and status changes can be especially valuable in the event of a disputed incident.

CONSTRUCTION AND OPERATION

The printer is housed in its own separate enclosure and is suitable for placement on a desk top, counter, or table.

INSTALLATION

The PRN-7 should be placed in a secure area to prevent theft of the printer and/or printed records. The PRN-7 must not be located further than 20 ft/6.10 m (actual cable length) from the control panel.

Consult the control panel installation manual for the proper method and PIN numbers used to complete the electrical connection to the control panel.

NOTE: If printer operation is required during failure of primary power, use of a separate UL-listed Uninterruptable Power Supply (UPS) system is recommended
